## *YOUR NEW ALFA-CLUB IS DIFFERENT!*

Congratulations, your new ALFA-Club rally clock has been completely redesigned from scratch.  It has **all of the functions and features** of the previous model ALFA-Club, plus these:

- Clock Mode Features:
  - 12 and 24 hour time modes.
  - Switch from seconds to hundredths, or even 1/10 seconds or thousandths, without loosing time or memory.
  - 16 times the split memory capacity. (500 splits vs 30)
  - Sync time with all previous ALFA Rally Link$^{tm}$ equipped clocks.
  - Sync with Timewise$^{tm}$ rally clocks.
  - "In the field" clock calibration.
- Odometer Mode Features:
  - Accurate, Factor Corrected, Speedometer.
  - Sending Unit Installation and Test Mode.
  - Automatic Factor Calculation.
- Device Features:
  - Flash memory now stores setup information when powered down.
  - Flash memory now stores up to 500 "Split Times" when powered down.
  - Optional, built in GPS receiver can both sync the clock and drive the odometer without a conventional sending unit.  This is the simplest and most self contained, purpose built, rally odometer/clock available.
- Optional Accessories:
  - GPS.
  - Power and Sending Unit adapter cable.
  - DIN adapter for older style ALFA clocks.
  - ALFA Sync Cable.
  - ALFA to Timewise$^{tm}$ adapter cable.
  - Basic Sending Unit (wheel mounted with magnets)
  - EZ-Pulse Sending Unit (mounted on hubcap or extended lug nuts)
